As mandated by ABC Adult School's accreditation agency, the Council on Occupational Education, the Job Placement rate is calculated as follows: The numerator consists of all graduates within the specified time period that got training-related jobs. The denominator consists of all graduates within the specified time period. Excluded from this calculation were graduates unavailable for employment because of pregnancy and other serious health-related issues, caring for ill family members, or death; and graduates who refused employment or enrolled in a program strictly for personal use.
